Co-Founder & Member

Analytical Builders LLC

At a young age I was always exposed to business. Growing up in a family owned business and being an entrepreneur was always something that was in my blood. I started as a Field worker at a construction company. From there I became a Project Estimator and went on to co-found the company, In-Line Disaster Recovery LLC.

Our company came to Puerto Rico after Hurricane Maria to repair homes that were damaged by the devastation through the *Tu Hogar Renace* program. We performed minor construction on the homes allowing the local people to have suitable living conditions. Our company was able to restore 300 damaged homes within a 5-month period and improve the quality of life for hundreds of local residents. Minor construction included demolition, plumbing fixtures, electrical, carpentry, framing, drywall, tile flooring, finishes, cabinets, and waterproofing.

After completing our work in the program, I co-founded Analytical Builders LLC. We gained the experience and knowledge of renovating homes while working in the program. We currently purchase real estate owned (REO) properties from local banks in Puerto Rico. As Co-Founder, our goal is to renovate homes in a timely manner and improve the quality of life for local residents while maintaining the quality we expect at Analytical Builders.
